Introduction

This course provides an overview to the implementation of the Solvency II Directive in Europe. The United Kingdom's departure from Europe will have a profound impact on how insurance companies operating in the UK comply with the regulation, particularly as UK regulators have now more flexibility with the solvency rules.

Solvency II like Basel II and III is part of UK and European Union law for insurance businesses by setting out capital and other requirements. The rules will change the way that companies set their objectives and strategic plans and will involve a lot of regulatory intervention.

Agenda

Risks

- Operational
- Liquidity
- Market
- Credit

Who Should Attend

This course is suitable for anyone involved in compliance for the insurance sector. It will also appeal to senior managers involved in strategic planning and wish to know how Solvency 2 will shape the insurance sector in the UK and Europe, particularly post Brexit.

Approach

Each topic will be expanded and explained to the delegates in a structured manner, developing their knowledge through diagrams, 'live' drawings and on-the-spot explanations. Active participation of the delegates will be encouraged, and exercises will be introduced at frequent and appropriate points.
