### **Introduction**

It is now becoming clear that even novice traders who look after their own pension portfolios can often beat the so called experts such as investment trusts, unit trusts and even hedge funds. Professional traders often have to comply with hundreds of pieces of regulation which affects their freedom to pick top quality investments. Incentive schemes amongst portfolio managers often encourage a 'herd mentality' leaving lots of opportunities for traders to spot, even with very basic research.

### **Description**

Our course is designed to take you through the basics of DIY investing from selecting a broker to dealing with the tax advantages of organising your own pension and investment strategy. We focus on helping you to set your investment objectives, to developing strategies for short term and long term investments. We reveal the mistakes that past investors have made so that you don't fall into the same traps. We help you to master risk management, optimise the risk reward relationship and show you those opportunities that are ignored by so called professional investors.

## Agenda

- **Tax breaks for the UK investor**  
Dividend Income  
Capital Gains
